

## A powerful Healthie integration to streamline patient conversations

OhMD offers a simple solution that keeps practice staff off the phones allowing them to focus on providing the highest quality care.

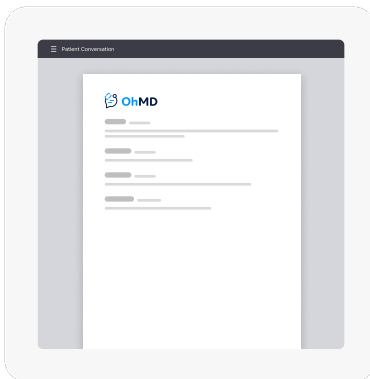

### Create patients once and you're done

OhMD simplifies the process for Healthie users to interact effectively with their patients. Patients registered in Healthie Enterprise or Group will seamlessly populate into OhMD, including their demographic information.

### Seamless two-way patient conversation in OhMD

Connect with patients via SMS text messaging, conduct video visits, and send electronic forms through OhMD's suite of secure, HIPAA compliant patient communication tools.

### Push the conversation back to Healthie in a click

Document every digital communication touchpoint and effortlessly push it all back to the patient's record in Healthie as a PDF with the press of a button.
